To whom it may concern

I listen to XM Satellite Radio and its local traffic and weather channels every day in my new car and find it extremely pleasant and informative. I purchased 2-year subscription and will be buying a home XM radio soon. I find XM radio head and shoulders above conventional radio programming which is packed with commercials I can't stand. I have the right to choose: pay my money and listen to what I want. It's like I choose to buy and read a decent newspaper instead of a free one! Who doesn't agree may continue listening to conventional radio. XM is the best thing that could happen to the radio - so let's embrace this change and allow a healthy competition.

I urge the FCC to reject the NAB's petition 04-160 and to support XM in any way possible!

Look at what happened to HDTV, it's just a shame! Let's not allow XM go down the drain.

People in Washington, please concentrate on more important issues i.e. outsourcing, creating new jobs in manufacturing and for misplaced middle class - they pay your salaries.

Sincerely,  
concerned US citizen and XM fan
